1998 Annual Index for *SIMULATION*

Volumes 70 and 71
Numbers 1 through 6

The index for articles in *SIMULATION* for 1998 appears in five parts. First is an **Index by Title: Technical Articles and Notes**. This list includes (1) article numbers, (2) titles, (3) first authors, (4) volume, number and month, and (5) pages. The **Index by Title: Running Columns and Stories** includes the same basic information. The other indices refer back to the article numbers that appear in this index. A slash (/) indicates a truncated title. The full title appears in the Index by Author.

The **Index by Author** lists all authors, but complete article information appears only under the listing for the first author: (1) name, (2) article number, (3) article title, (4) co-authors, (5) issue volume and number, and (6) pages. For co-authors, the index refers you to the first author's listing, or to the article number in the Index by Title.

The **Index by Keyword** includes the keyword(s), followed by the (1) article number, (2) issue volume, number and month, (3) pages, and (4) first author. Last is the **List of Special Issues**.

The SCS Website includes full titles, author information and abstracts for all Technical Articles and Technical Notes. Go to *scs@scs.org* and select *Publications*. Then select *SIMULATION*, then *Table of Contents* for 1998, volumes 70 and 71.
